

BARAUSSE

[company video](#)

Barausse develops and manufactures
doors, partitions and wall paneling
designed to make the living environment
sublime. Barausse products are the result
of a strong handcrafted tradition
in woodworking combined with
technical skills and a proactive approach.

**“Making the living environment sublime,
sculpting a design that enhances
the functionality, applying the knowledge
and experience of our team to pursue beauty:
we seek the unquestionable aim of creating
a system of products that improves the quality
of living and enhances the value of the project.”**

Continuity System

BARAUSSE

Continuity represents a natural transition from the “door system” to the expansion of **integrable products**, including sliding systems, partitions, walk-in closets, equipped walls and pivoting doors. The system confirms the company’s mission: to develop and supply customizable solutions, meeting the increasingly high expectations deriving from **Made in Italy** products.

CASA BARAUSSE

“A visual project which adopts
a concrete interpretation
of sustainable living philosophy”

An abstract composition of overlapping geometric shapes. A large, horizontal wood-grain rectangle is the central focus. To its left, a dark, textured fabric square overlaps it. Above the wood rectangle, a dark, solid rectangular block is visible. To the right of the wood rectangle, a light gray square overlaps it. Below the wood rectangle, a dark, solid rectangular block is visible. The background is a light gray, textured surface. The overall aesthetic is modern and sophisticated, emphasizing material textures and geometric forms.

**“We combine the warmth of wood
with the neutral shade of aluminium
to create sophisticated environments”**

The clear-cut structure echoes the magnificence of modernism with a contemporary twist, combining the shapes and hues of nature with the essential geometry of the architectural style. The ground floor layout is the outcome of the perfect fusion of architecture and landscape, precisely the large, smooth surfaces reflecting sunlight, and the large windows offering scenic views of water and surrounding vegetation.

An open plan, developed in an additive and harmonious manner to meet the needs of contemporary man, according to the Barausse philosophy

Piano Terra
Ground Floor

The top floor is, instead, organised according to user needs, with particular focus on personal care areas. A comprehensive, person-centred project, which restores Barausse vision of living. An harmonious environment studied down to the smallest detail, with a continuous flow of furniture, doors and panelling, to please the eye and convey a feeling of well-being.

Piano Primo
First Floor
